Answergrove pilot: day-10 summary

Customer: [name]. Site or library: [address]. Pilot dates: [start] to [end]. Prepared by SIA KSJ, [date].

In short

- Questions asked: [n]. Answered with a correct source: [n]. Not answered or wrong: [n].
- Recommendation: [roll out / roll out after fixes / stop], because [one sentence].

1. Access check (days 1-2)

- What we found: [external users, sharing links, folders with their own permissions].
- What the customer closed before indexing: [list].

2. Permission test (day 5)

- Restricted document: [name]. Person without access: [role].
- Result: [no answer from the document / problem found and fixed].

3. Real questions (days 6-9)

- Answered well: [2-3 examples, each with the document, page and version cited].
- Not answered, and why: [missing document / scanned file without text / question outside the site / other].

4. What would improve results

- [For example: add library X, replace scanned PDFs with text versions, archive old copies.]

5. Next step

- Rollout scope: [sites or libraries, users, languages].
- Fixed price: [Starter 4,950 EUR / Pro 9,950 EUR / Enterprise from 19,950 EUR], minus the 1,500 EUR pilot already paid.
- Azure AI model quota in the customer's subscription: [sufficient / requested on (date)].
- If the customer continues, Answergrove is installed in the customer's own Azure subscription. If not, the Answergrove page and the two app registrations are removed with the customer's admin.
- Pilot data (index, document excerpts, logs) in the Azure environment of SIA KSJ is deleted within 30 days after the pilot ends.
